2 Layer PE Coated Release Paper (175mm)	20+50=70	295	₹295.00	18	₹53.10	₹1,02,689.50
					Grand Total	₹2,18,833.50

This Given Quotation Can Vary +- 5 %

The Given Quotation Is For 1 Lakh pads Including wasatge

Hydrophilic Fabric

It is the fabric that is water absorbing and hence clear with the name “Hydrophilic”. This fabric is made using polypropylene, a hydrocarbon polymer & and hydrophilic resin. This makes it water-loving. This is the crucial fabric that is used in making pads for liquid absorption.

SAP Sheet/Cotton

SAP Sheet stands for Super Absorbent Polymer Sheet which is the main layer of sanitary pads. Some times cotton is used instead of SAP sheet.

Non Woven Fabric

PP Spunbond Fabric is a type of nonwoven fabric used in sanitary pads. Non woven fabric works for the distribution of the fluid. The pp spunbond fabric is by default hydrophobic.

PE Coated Release Paper

PE Coated Release Paper is used in bottom packing paper of sanitary napkin and panty liner.
